

Google Earth Elementary Measuring Tour

2.3B, 2.5B, 2.11AB, 3.13.1 B, 3.3B, 3.13A

1. Open Google Earth.
2. Locate the .kmz file named NEISD Tour on the student shared drive, open the .kmz file.
3. Click on Show Ruler. Complete the tasks on your recording sheet using the Measure Path device to answer questions.

Tips for using the Measure / Path feature: Click on the screen when you want the path to turn onto another street. Be sure to stay on streets! Use the zoom in tool until you can see the streets. If you need to change the screen view, use the navigation arrows.

Zoom Slider

Name: _____

Round all of your answers to the nearest mile.

1. The distance between Northwood Elementary and Garner Middle School is _____ miles.

2. The distance between Garner Middle School and Oak Grove Elementary is _____ miles.

3. The distance between Oak Grove Elementary and Regency Place Elementary is _____ miles.

4. The distance between Regency Place Elementary and Garner Middle School is _____ miles.

5. If you were driving from Northwood Elementary to Garner, and then to Oak Grove, how many miles would you be traveling?
