

Adding Web Links to a Map in Google Maps and Google Earth

1. In Google Maps

- a. Locate the Web site you wish to link to and copy the URL
- b. Go to Google Maps - <http://maps.google.com/>
- c. Log in as cscmaps09@gmail.com with the password [cscmaps09](#)
- d. Click on "My Maps" and click on "Create a New Map"
- e. Give your map a title
- f. Zoom in on Vermont by dragging with the hand tool and double-clicking on Vermont.
- g. Move a placemark on top an appropriate spot
- h. Click on the placemark symbol to change it to a different placemark if you wish.
- i. Give it a title and description.
- j. Click on the "Rich text" link and type in the text that you would like to use for the link.
- k. Highlight the words and click on the link button

- l. Paste in the URL from the site you wished to link to, click OK, save the map and click "Done."
- m. Now you should be able click on the place mark and be able to click on the link to go to that site.

2. In Google Earth

- a. Open Google Earth
- b. Add a placemark to your map by clicking on the placemark button and then dragging it to the position you want.
- c. Give the placemark a name.
- d. In the Description box copy and paste the following html code:

```
<a href="http://www.ccsuvt.org/fleming">Click here to visit the Thomas Fleming School Web Site</a>
```
- e. The section of the code highlighted in yellow is where you will insert your URL. The blue section is the text that the user will see as the clickable link.
- f. Click OK. When you click on the placemark you should see the link that can be clicked on to go to that Web site.
